Vela is a collection designed by the architect Ramón Esteve for Vondom. This extensive collection of outdoor furniture and planters seeks to provide the comfort and warmth of the interior furniture without losing its original qualities. Vela is a modular system with a prismatic elementary geometry that bases its singularity in the balance of its proportions. Items can be combined together in order to fit in any space. The flat volumes seem to float a few inches off the ground and when illuminated become light architectures. Vondom offers this collection in different finishings and can incorporate light. This ephemeral installation in the building “Veles e Vents” by the prestigious architects David Chipperfield and Fermín Vázquez was designed by Ramón Esteve Studio.

VINCCI GALA

Hotel

The most allegorical elements of this stunning and stately hotel of the 1900s are found in its remodel, particularly as they speak to the preservation of its original neoclassical facade and central staircase. Images of the catalonian painter Salvador Dalí and his wife Gala are strewn throughout various corners of the hotel, giving way to a “surrealist” experience. In the lobby two elegant planters by STUDIO VONDOM preside over the stairway to the terrace, where a tranquil and vanguardist space awaits visitors and invites them to relax at the heart of the city. VONDOM's FAZ MOMA and FIESTA Collections furnish the area in tones of bronze and white. The result is a hotel getaway where design and tradition reside in perfect harmony, nodding respectfully to the city's modernist spirit.

Los elementos más alegóricos de este proyecto residen en su remodelación, al tratarse de un edificio señorial del año 1900 del que se ha conservado la escalera central y la fachada neoclásica. Imágenes del pintor catalán Salvador Dalí y su esposa Gala se exhiben por distintos rincones del hotel para convertir la estancia en una experiencia “surrealista”. En el lobby, dos elegantes maceteros by STUDIOVONDOM presiden la escalera de acceso a la terraza exterior, un lugar relajante y vanguardista que invita al relax en pleno centro de la ciudad. Las colecciones FAZ, MOMA y FIESTA amueblan esta zona en tonos bronce y blanco. El resultado de este proyecto es un lugar donde el diseño y tradición conviven en perfecto equilibrio, respetando la esencia modernista de la ciudad.

The Aulario is a six-level building interconnected by a large central space that illuminates each level. Its architecture is characterized by a succession of tiered concrete beams that delineate its various sitting rooms and auditoriums. Stefano Giovannoni and Elisa Gargan's STONE Collection populates each level. Their delicate organic silhouettes break away from the building's rectilinear forms, creating a balance of shapes that elegantly become part of the project's interior design backdrop. The collection's harmonious greyish tones, both in anthracite and steel, set off a contrast amongst gradations of red, creating a space filled with warmth, dynamism and vitality.

El Aulario es un edificio compuesto por 6 niveles interconectados a través de un vacío central que los ilumina. Su arquitectura se caracteriza por la sucesión de vigas de hormigón dispuestas de forma escalonada que conforman las distintas salas auditorio. Los conjuntos de mobiliario STONE by Stefano Giovannoni y Elisa Gargan dispuestos en cada uno de los niveles forman parte del interiorismo de este proyecto. Su silueta delicada y elegante de origen orgánico rompe con la linealidad de la arquitectura. La armonía cromática basada en tonalidades grisáceas mediante los colores antracita y acero, se ve alterada mediante matices rojizos que buscan el contraste, aportando calidez, dinamismo y vitalidad al espacio.

They are not recommended as a permanent cover for cushions, as moisture may collect and lead to the formation of mold stains. Furniture and cushions should be thoroughly dry before using the covers. Please note that the covers are especially tailored to your furniture item and precise placement is required. In order to increase the circulation of air and avoid the formation of condensation, the covers are not made to floor length. Never pack or fold covers that have become wet; instead, let them dry in a well-ventilated place. Use a soft cloth and warm water to clean the covers, using a gentle upholstery cleaner if necessary. USO Y MANTENIMIENTO

Las fundas Vondom son impermeables y repelen el agua, el aceite y la suciedad y sirven para proteger el mueble. Pero no sirven para cubrir los cojines de forma permanente porque se puede formar humedad junto a las costuras de la funda y dejar manchas de moho en la tela. Antes de utilizar las fundas, el mueble y los cojines han de estar secos. Tenga en cuenta que las fundas están adaptadas especialmente a sus muebles y es necesario colocarlas correctamente. Para aumentar la circulación de aire, las fundas no llegan al suelo. No guardar o doblar las fundas húmedas, dejar que se sequen en un lugar con buena ventilación. Para limpiar las fundas utilice un paño suave, agua caliente y un producto de limpieza suave si es necesario. Después lávelas con agua. Los disolventes no son aptos para la limpieza de las fundas porque pueden atacar, dañar o decolorar la superficies a tratar.

INSTRUCCTIONS_ Product Description

- 1.- Water tank level indicator, verifiable at any time.
- 2.- Expanded clay works as drainage. This will prevent stagnation, control water flow & assure root aeration.
- 3.- Vegetal soil.
- 4.- Self-watering base where the plant absorbs the water.
- 5.- Water tank.
- 6.- Option of wheels o feet.

INSTRUCCTIONS_ Planting Instructions

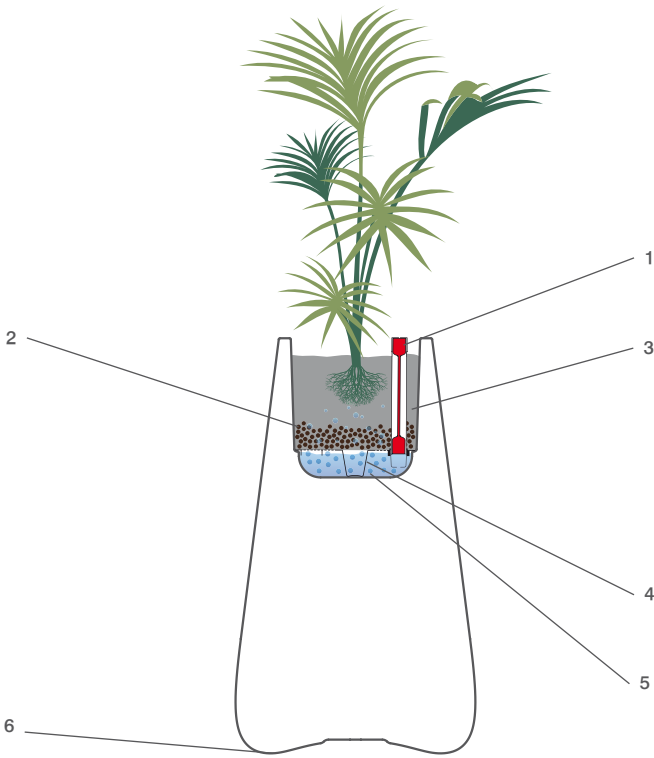

- Set a fine layer of about 2 or 3 cm. in deep of expanded clay on the base of the self-watering base.
- Add the vegetal soil for plants in the flowerpot, leaving space for the root ball of the plant.
- Planting the plant in the flowerpot, previously aerating the roots in order to favour its growth. Finish filling the flowerpot with vegetal soil & press down on the soil with your hands to make it perfectly compact.
- Water the plant on the soil. In the following weeks, please water the plant over the top as the roots of the plant have not reached the platform layer of the self-watering apparatus yet, where the water tank is stored.

INSTRUCCIONES_ Descripción del producto.

- 1.- Indicador de nivel de agua del depósito, comprobable en todo momento.
- 2.- Arcilla expandida, actúa como drenaje. Evita el estancamiento, dosifica el transporte del agua y garantiza la aireación de las raíces.
- 3.- Tierra vegetal.
- 4.- Base de autorriego donde la planta absorbe el agua.
- 5.- Depósito de agua.
- 6.- Opción de ruedas o patas.

INSTRUCCIONES_ Instrucciones de plantado

- Ponga una capa fina de arcilla expandida de unos 2 ó 3 cm. de grosor sobre la base del autorriego.
- Añada la tierra vegetal para plantas a la maceta, procurado dejar un hueco para el cepellón de la planta que quiera plantar.
- Plante la planta en la maceta aireando previamente las raíces para favorecer su crecimiento.Acabe de rellenar con tierra vegetal la maceta y presione bien la tierra con las manos para una perfecta compactación
- Riegue la planta sobre la tierra. En las próximas semanas tendrá que regar por encima, ya que las raíces de la planta no han llegado hasta la capa de la plataforma del autorriego, donde se encuentra el depósito del agua.

RECOMMENDATIONS

After this period of adaption for the roots, fill the water tank until the top very slowly until the indicator reaches the maximum level. If there is no water, the indicator will be at the minimum level, check the indicator level regularly. The period of watering depends on the flowerpot size, plant type and its location. Consult it with a professional in the sector.

INDOOR (Light and Led finishes)

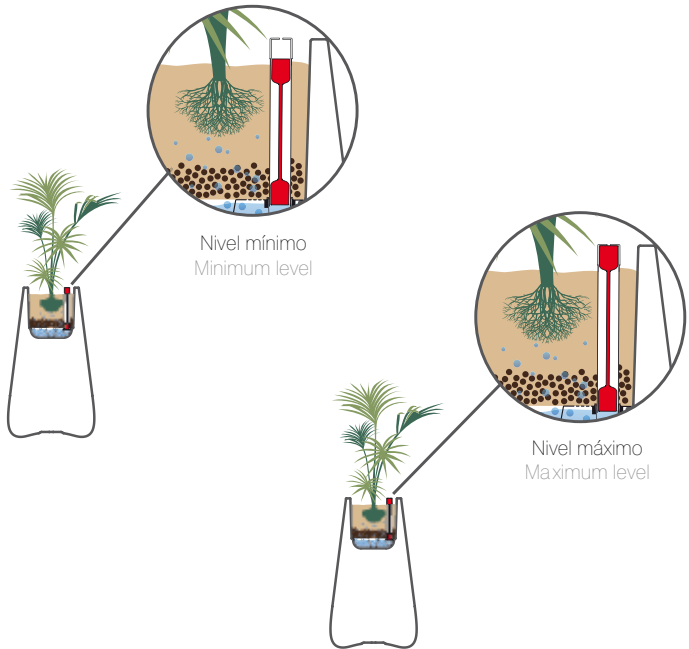

For indoor use, need to check if the stopper of drainage is placed before planting the plant.

OUTDOOR

For outdoor use, please take off the stopper of drainage (Light and Led finishes) and drill the holes at the indicated mark, bearing in mind the position of the water tank (Basic, Self-Watering and Lacquered) and also in the base of the flower pot, so that if it rains, the water overflow will evacuate and not harm the plant.

If you cover the soil with a fine layer of stones, it will stop the moisture from evaporating and improve its aesthetic appearance. For fertilizing and better care of your plants, consult your gardener or your garden centre. VONDOM, accepts no responsibility for any damage done to the plants caused by the incorrect use of flowerpots.

RECOMENDACIONES

Después de este período de adaptación de las raíces, llene el depósito de la reserva del agua al máximo, muy lentamente hasta que el indicador del agua suba hasta su nivel máximo. Si no hay agua el indicador estará al mínimo. Compruebe periódicamente el nivel del indicador del agua. El período de regado depende según el tamaño de maceta, tipo de planta y de su ubicación. Consúltelo con un profesional del sector.

INTERIOR (acabados Luz, Led RGB)

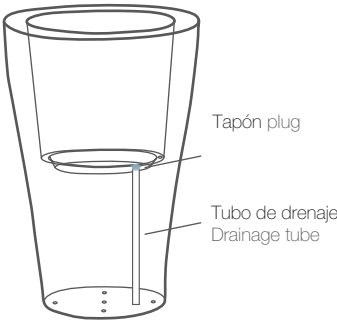

Para uso interior se tiene que comprobar que el tapón del drenaje esté colocado antes de plantar la planta.

EXTERIOR

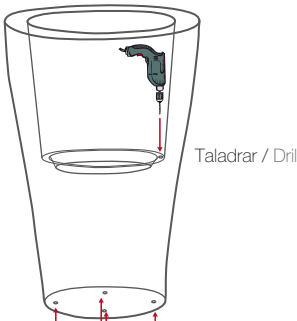

Para uso en el exterior se tiene que sacar el tapón del drenaje (acabados Luz, Led RGB) y taladrar los puntos de precorte respetando la reserva del agua (acabados Basic, Lacado y Autorriego) y en la base de la maceta, ya que si llueve el agua sobrante podrá evacuar y no dañará la planta.

Si cubre la tierra con una capa de piedras de jardinería, evitará que se evapore la humedad y mejorará su aspecto estético. Para el abonado y un mejor cuidado de sus plantas, consulte en su tienda especializada o a un profesional del sector. VONDOM, no se hace responsable de cualquier daño ocurrido en la planta debido a un mal uso de sus macetas.
